

Assignment 1 : Scheduling using Zapier

Zap 1: Payment Request Automation

Step 1 – Schedule by Zapier

- Configured a scheduled trigger to initiate the automation at the defined time.
- This starts the workflow and checks the Google invoice sheet for payments that are still pending.

Step 2 – Google Sheets – Lookup Spreadsheet Rows

- Connected the Google Sheet containing the invoice records and filtered for invoices with **Pending** payment status.
- This identifies the invoices that require a payment request to be sent.

Step 3 – Looping by Zapier – Create Loop From Line Items

- Created a loop using the Invoice ID, Name, and Amount fields retrieved from Google Sheets.
- This ensures that each pending invoice is processed separately and receives its own payment request.

Step 4 – Gmail – Send Email

- Configured Gmail to automatically send a personalized payment request for each invoice.
- The email dynamically includes the **Invoice ID**, **recipient Name**, and **Amount**, along with instructions to confirm payment.

Zap 2: Automated Payment Confirmation

Step 1 – Gmail – New Email

- Configured Gmail to monitor the sender's inbox for incoming replies to the payment request emails.
- This allows the workflow to detect when the recipient responds with a payment confirmation.

Step 2 – Filter by Zapier

- Added a condition to allow the workflow to proceed only when the incoming email contains “**Payment Done.**”
- This prevents unrelated emails from triggering an invoice status update.

Step 3 – Formatter by Zapier – Text

- Configured the Formatter to extract the **Invoice ID** from the subject of the payment confirmation email.
- This identifies which specific invoice the payment confirmation relates to without requiring manual entry of the Invoice ID.

Step 4 – Google Sheets – Lookup Spreadsheet Row

- Used the extracted Invoice ID to search the invoice spreadsheet and identify the corresponding record.
- This ensures that the payment confirmation is applied to the correct invoice.

The screenshot shows the Zaps interface for a Zap titled 'Payment Confirmation - Update Invoice'. The main workspace displays a 'Google Sheets' trigger labeled '4. Lookup Spreadsheet Row'. The right sidebar shows the configuration for this step:

- Spreadsheet: SCIT_invoice
- Worksheet: Invoice
- Lookup column: Invoice ID
- Lookup value: 3. Output: 1001

Step 5 – Google Sheets – Update Spreadsheet Row

- Updated the identified invoice record by changing its payment status from **Pending** to **Completed**.
- This automatically maintains the latest payment status in the central invoice tracking sheet.

The screenshot shows the Zaps interface for a Zap titled 'Payment Confirmation - Update Invoice'. The main workspace displays a 'Google Sheets' trigger labeled '5. Update Spreadsheet Row'. The right sidebar shows the configuration for this step:

- Spreadsheet: SCIT_invoice
- Worksheet: Invoice
- Row: 4. Row: 2
- Status: Completed

SCIT_invoice

Test:

1. Created action: To send the mail to the accounts team
2. Mail sent

The image displays two screenshots of the Zapier web application interface.

The top screenshot shows the 'Payment request reminder' Zap in 'Draft' status. The workflow consists of four steps:

- Schedule by Zapier**: 1. Custom Frequency
- Google Sheets**: 2. Lookup Spreadsheet Rows...
- Looping by Zapier**: 3. Create Loop From Line Items
- Gmail**: 4. Send Email

The bottom screenshot shows the 'Payment Confirmation - Update Invoice' Zap. A 'New Email' action is being configured with the label 'INBOX'. A notification at the top indicates 'v1. is in use by Ananya D. 18 minutes ago'.

Test:

The screenshot shows the Zapier web interface. At the top, the browser tab is 'Payment request reminder' with a 'Has Draft' status. The main area displays a Zap configuration with four steps: 1. Schedule by Zapier (Custom Frequency), 2. Lookup Spreadsheet Rows... (Google Sheets), 3. Create Loop From Line Items (Looping by Zapier), and 4. Send Email (Gmail). A sidebar on the left shows 'Zap runs' with a search bar and filters. A right sidebar shows the 'Run details' for the first step, indicating it ran on 2026-09-30 at 14:51:46 Asia/Calcutta, with data including ID '2026-09-30T09:21:09Z' and 'Pretty Date' 'Sep 30, 2026'.

The screenshot shows a Gmail inbox. The selected email is from 'Ananya Dileep' with the subject 'Payment Required - Invoice 1002'. The email body contains the following text: 'Dear Team, A payment is pending for the following invoice: Invoice ID: 1002 Name: Ram Amount: ₹28000 Please process the payment and confirm once the payment has been completed. To confirm the payment, please reply with: Payment Done - Invoice ID: 1002 Regards, Accounts Team'. The email is marked as 'External' and 'Inbox'.

The screenshot shows a Gmail inbox with a reply email. The email is from 'ananya.dileep' with the subject 'Payment Done'. The email body contains the following text: 'Ananya Dileep PRN: 25030242004 Ph No: 9969190893'. The email is marked as 'External' and 'Inbox'.
